

# Studying in the heart of London

- B Eng (Hons) Mechanical and Design Engineering**
- B Eng (Hons) Civil & Infrastructure Engineering**
- B Eng (Hons) Engineering Systems**
- B Eng (Hons) Bio-medical and Healthcare Systems**
- BSc (Hons) Computer Science**

## About PSGIAS

PSG Institute of Advanced Studies, an institution under PSG group offers opportunities for international education. In order to make the International Education at affordable fees, PSGIAS has entered into collaborations and signed a number of MoUs with various Universities under which the major part of study is undertaken in India. Currently under academic collaborations with Universities of USA, Germany, Australia and UK the joint academic UG / PG programs in Engineering, Business and Fashion are offered.

## About City, University of London

[www.city.ac.uk](http://www.city.ac.uk)

City, University of London, is a public research university in London, United Kingdom, and a member institution of the federal University of London. It was founded in 1894 as the Northampton Institute, and became a university when The City University was created by royal charter in 1966. The Inns of Court School of Law, which merged with City in 2001, was established in 1852, making it the university's oldest constituent part. City joined the federal University of London on 1 September 2016, becoming part of the City's tradition of providing high quality education relevant to business and the professions eighteen colleges and ten research institutes that then made up that university. dates back 160 years. For many of our graduates, time spent at City laid the groundwork for leadership, innovation and excellence that have changed the world we live in.

At City we have six specialist Schools (including School of Science & Technology) which is a diverse, inclusive and multidisciplinary centre of study and research, located in the heart of London's vibrant design community. Formerly called the School of Mathematics, Computer Science and Engineering.

## Placements and Internships

City, University of London's Corporate Relations & Employability Unit supports both students and employers through the process of undertaking or providing placements, internships and work-based learning.

The Corporate Relations & Employability Unit (CREU) operates within the School of Science & Technology. The unit supports both students and employers through the process of undertaking or providing placements, internships and work-based learning.

The CREU offers a variety of bespoke work-based learning programmes, all of which have been designed to accommodate varying requirements of students and employers.

We educate our students by integrating professional development planning and employability into course material. We connect our academics with industry professionals to enrich programme content and gain professional input for course design.

Our team provides employers with a simple and complete service that enables organisations to access City talent.

## Our Aims

We aim to enhance the student experience, by equipping our students with the tools required to bridge the gap between education and employment.

- Source internships and placements
- Educate about employability
- Professional Development planning
- Enrich programme content with industry input
- Organise specialist events
- Connect academia with industry.

## Professional development

The CREU promote professional development by helping students focus on planning in pursuit of achieving excellence, building a portfolio of skills, employability, and understanding the professional, legal and ethical issues that underpin the professions.

With strong engagement with employers, we deliver a comprehensive and successful framework for supporting students to realise their career potential and for ensuring our students are equipped with the skills for business.

We are always looking for employers to collaborate with in order to support our students with their professional development – through participation in delivering workshops, lectures or other forms.

## Mechanical and Design Engineering

This degree gives you the technical skills needed to design, develop and operate advanced machines and mechanical engineering systems. If you want to drive sustainable and innovative solutions to real-world challenges across sectors such as transport, energy or manufacturing, you're in the right place.

## Civil and Infrastructure Engineering

This degree gives you the knowledge and skills to design civil and infrastructure engineering facilities that are resilient and sustainable. You will study structural, geotechnical, and hydraulic engineering, with a focus on digital and data-driven collaborative engineering design for a low-carbon future.

## Engineering Systems

This degree enables you to understand and apply scientific and technical knowledge to the design of tomorrow's enhanced engineering systems. You will develop a high level of engineering expertise, spanning from systems thinking principles, to new technologies, preparing you for the global demands of industry.

## Bio Medical and Healthcare Systems

As a trained biomedical and healthcare engineer, you directly apply the principles of science, engineering, and medicine to the operation of complex medical technologies. The expertise you develop at City will be used in the prognosis, diagnosis, monitoring and treatment of sick and injured people.

## Computer Science

If you are interested in how software technologies are built and work, our Computer Science degree is ideal. You'll learn about programming languages, coding and solving computational problems. Your practical expertise can lead to careers in development and architecture for software, systems and mobile apps.

## Student's life

Your student life at City is never boring. Enjoy the vibrant experience of London and our local area, as well as the wellbeing, social, religious and volunteering activities offered on campus.

## Opportunities at City

Make the most of London life. City is a short journey away from the British Library, free museums and the spectacular West End

Meet new people through work opportunities and volunteering within the local community

Enjoy our facilities such as CitySport, a modern sports and fitness centre offering classes for individuals and the chance to join sports teams

Get to know our north London home of Islington, with its stylish cafés, restaurants, theatres and arts venues.

## Your student life in London

Here at City we have countless clubs and societies where you can develop skills and meet people from around the world. You might take a new fitness class or try a new sport at our sports and fitness centre. Or you could sign up for social initiatives such as the City Buddies scheme.

You can also expand your network through your faith. We have active societies for many faiths and our chaplaincy team offers a multi-faith room where you can practise and pray.

Engage with the local community outside City through events like Clerkenwell design week, or by taking opportunities to volunteer in the local area.

## Facilities

### Accommodation and housing

We aim to take the stress out of finding somewhere to live, when you become a student at City. Our halls are affordable and conveniently located, with places guaranteed for those meeting the criteria.

## Why choose City accommodation?

Most halls are in walking distance of the University

Access to a wide network of accommodation

## Why choose halls

As a student at City, you can choose from a wide range of University accommodation, most of it in walking distance of lectures, classes and laboratories. We invest heavily in subsidies on undergraduate rents to keep your costs low and unlike many universities, we don't make any distinction based on where you're from.

So, halls are open to all students and you will become part of a diverse community of people from different backgrounds. Our Guarantee Scheme for first year undergraduates means you are assured of a room in halls if you meet the criteria.

## Why choose private accommodation

If you prefer the idea of private accommodation, you are in the right place – based in the heart of London, there is a huge choice of rooms, flats and houses.

The private accommodation service is run by the University of London Housing Services, which means you have access to a wide network of accommodation and there is free advice from the University's housing experts, in case you ever need help resolving an issue with your landlord.
